

Please Please Please do not change Indiana's Telephone Privacy law concerning Telephone Privacy!!!!!!

The FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections. I should have a choice if I want calls or not.

Indiana's Telephone Privacy law has improved my personal time at home since I no longer receive so many calls I don't even want to receive.

My mom that is up in age no longer gets the high pressure calls. She is too nice to hang up on them and sometimes gets talked into buying something she really didn't want or need.

PLEASE do not water down the Indiana version of this law!!!

PLEASE consider the good it has provided for us little guys that have very little power to fight against the big MONEY.

Greg Wade
